

New Study Booklet No 47 – “Union Stamp Booklets”.

By Tony Howgrave-Graham

A new, highly detailed, 109-page booklet entitled ‘Union Stamp Booklets’ is now available to purchase by members at £18.00 each. The booklet is based on Tony Howgrave-Graham’s excellent display at the South African Collectors’ Society Summer Conference in Kenilworth in May 2026.

A very, extensive and comprehensive study collection featuring, examples of every Union Stamp Booklet from the first booklet produced in 1913. It also shows how the booklets were constructed and includes the sales of the remainders. The study booklet illustrates all panes where they are plateable and includes examples of tête-bêche pairs, voucher copies and many varieties.

Many of the stamp booklets are shown in ‘exploded’ format illustrating the advertising panels and interleaves, along with copies of complete booklets. Drawn descriptions of printed cylinders showing how the panes were produced adds to the very detailed information.

A fantastic in-depth study and informative asset for those members who collect Union Stamp Booklets.
